

My Science Notebook

Scientists use a notebook to:

- § Record observations and data
- § Make detailed drawings
- § Organize information in graphs, charts or tables
- § Reflect on what was experienced or learned
- § Record new or unanswered questions
- § Develop theories and compare findings with others

These guidelines will help you create an interesting and organized notebook that shows what you have experienced or learned.

- § Write neatly and clearly
- § Number pages in upper corners
- § Correct mistakes
- § Record the title and date in the table of contents to help remind you of the topic
- § Label all drawings
- § Use sentences to communicate your observations, plans, explanations and conclusions

Use these sentence starters to help you get started.

- | | |
|-------------------------|-----------------------|
| I discovered that... | My data shows... |
| I wonder why... | This relates to... |
| I noticed that... | This is similar to... |
| I was surprised when... | What if... |
